

PROMASTER®

55-200mm Digital XR EDO Aspherical Auto Focus Zoom Lens

Features:

The 55-200mm Digital XR EDO Aspherical Auto Focus Zoom Lens is a telephoto zoom for exclusive use on digital SLR cameras that covers the focal length range equivalent to 85-310mm when converted to a 35mm format. This lens is the perfect compliment to a "standard" zoom on a digital SLR.

The 55-200 Digital XR EDO lens is small and compact while realizing a minimum focus distance of just 37.4" over the entire zoom range.

PROMASTER EDO lenses have higher resolution, better control of flare and ghosting, less light fall-off and lower chromatic aberration than traditional lenses meant for film based SLR's.

Available to fit:

Canon EOS, Nikon AF, KonicaMinolta and Sony Digital SLRs

Specifications:
