

I. Features

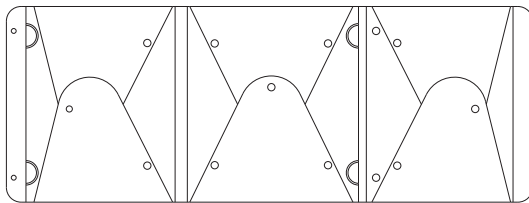

Congratulations on your purchase of the [pro]master Snap Studio. With it you will enjoy great tabletop photography with excellent lighting and simple, non-distracting backgrounds. It is built to be lightweight, portable, and a 'snap' to set up and use.

The Snap Studio features high quality LED lighting for cool operation and low power consumption. Its USB power cable can be connected to a common wall AC outlet or to a portable USB battery pack. A specially designed diffusion panel will help reduce specular highlights from the LEDs when photographing extremely shiny objects. The unit's shell is lightweight, portable, and easy to clean for years of service. 3 backgrounds give you a choice of colors.

II. Precautions

1. Avoid water or moisture near the LED light and power cord.
2. Do not use any type of solvent or bleach to clean the unit.
3. Don't lend the Snap Studio to your friends. You may not get it back!
Instead, refer them to your closest ProMaster dealer.

III. Contents

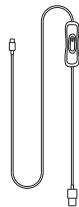

Snap Studio Shell

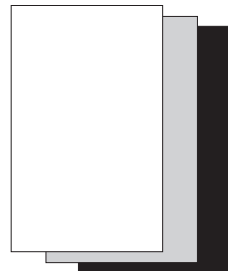

LED Light

Magnets X2

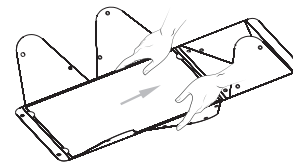

USB Power Cable

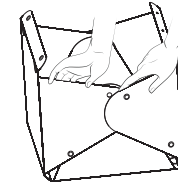

Swappable Backgrounds
(white, grey and black)

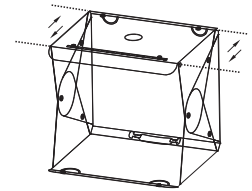

IV. Setting up the Studio

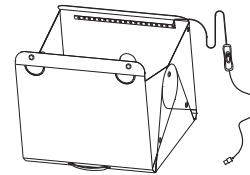

Step 1: Insert the background

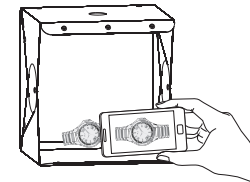

Step 2: Fold the side panels so they overlap and snap them together.

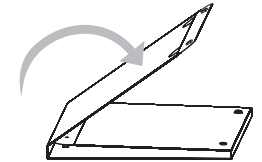

Step 3: Hold the LED to the bottom side of the top panel and apply both magnets to the top of the panel to hold it in place

Step 4: Run the USB power cable through the access hole and connect it to the LED.

Step 5: Connect the USB cable to a power source and then turn the light on using the rocker switch.

Step 6: Disassemble in reverse order and close the studio for portability or storage.
