

PROMASTER®

70-300 EDO F/4- 5.6 LD Macro Auto Focus Zoom Lens

Features:

This is the definitive lightweight, compact telephoto macro auto focus zoom lens -- ideal for shooting subjects that are difficult to approach such as sporting and theatrical events. The macro mode features a maximum magnification ratio of 1:2 at a minimum focus distance as short as 37.4", enabling close-up shots of flowers, insects, and other objects that normally require the use of a specially designed macro lens. The optical system incorporates a LD (Low Dispersion) lens, resulting in clear sharp images free of chromatic aberration and our Enhanced Digital Optic (EDO) design, making it the ideal lens for use with both digital and film cameras.

Specifications:

- Lens Construction: 13 Elements in 9 Groups
- Minimum Aperture: f/32
- Minimum Focusing Distance: 59" (1.5m) Normal; 37.4" (0.95m) Macro
