

PhotoImage  
**Black &  
White**

**Variable Contrast Photographic Paper**

## **TECHNICAL DATA**

**PROMASTER PhotoImage Black & White RC Variable Contrast Photographic Paper** features a bright white base with rich blacks. By using variable contrast filters, the paper will yield a wide contrast range from soft (1) through high contrast (5-6). The developer incorporated emulsion also allows shorter development times (60-90 seconds at 68 degrees with tray processing).

### **Safelight Recommendations:**

An OC type (amber) safelight such as Ilford S90A. **OA (yellow) Safelight filters are not acceptable.** Sodium Vapor **Safelights** are acceptable, but should be tested. Regardless of the **Safelight** choice, a **Safelight** test should be performed before starting to print.
