

PROMASTER®

11-18mm Digital XR EDO Aspherical Auto Focus Zoom Lens

Features:

The PROMASTER 11-18mm Digital XR EDO lens is an ultra wide-angle auto focus zoom lens designed for exclusive use with digital SLRs. Its extended 11mm focal length (17mm equivalent when converted to 35mm format) is in demand by today's advanced and professional photographers using digital SLRs. With this extremely wide angle you can get the entire family in the picture in a tight indoor space or take breathtaking panoramic photos on your next outing.

The AF 11-18mm XR EDO features a non-rotating 77mm filter threads that means your special effect filters will not change when the lens' focus is changed. For best results from your digital SLR we recommend the use of PROMASTER Digital filters.

PROMASTER EDO lenses have higher resolution, better control of flare and ghosting, less light fall-off and lower chromatic aberration than traditional lenses meant for film based SLR's.
